📺 rosexw

I am a full-stack software developer coming from a chemistry and business background. I have a degree in Chemistry/English Literature, a postgraduate certificate in Global Business Management, and, most recently, a certificate in Full-Stack Web Development. I am a hard worker who doesn't give up until the project is completed. I love being able to mix in my artistic, with my analytical sides and am interested in front-end development. My most recent experience includes working on web and mobile applications with Evermight.
