I am an eager web developer coming from a chemistry and business background. I have a degree in Chemistry/English Literature, a postgraduate certificate in Global Business Management, and, most recently, a certificate in Full-Stack Web Development. I am a hard worker who doesn't give up until the project is completed, working 14 hours a day to become a full-stack junior web developer in only 8 weeks. I love being able to mix in my artistic, with my analytical sides and am interested in front-end development.
